

## About:

Web Development is the process of building websites and web applications. I specialize in creating visually appealing and user-friendly websites that provide seamless experiences. With expertise in front-end and back-end technologies, I bring ideas to life and create dynamic web solutions. I aim to deliver outstanding user experiences through modern web technologies and interactive features. Let's work together to create a remarkable online presence that captivates your audience and achieves your goals.

## Skill Highlights

---

- HTML5
- CSS3
- MySQL (Database)
- PHP
- JavaScript
- Vue.js

### Other:

- C++
- Python
- Java/Java GUI
- Java web application (servlet/jsp)

## Experience

---

During my journey in web development, I have gained valuable experience through various university projects and internship programs. These opportunities have allowed me to work on real-world web development projects, honing my skills and expanding my knowledge. Collaborating with teams, I have learned the importance of effective communication and teamwork in delivering successful web solutions. Additionally, I have gained experience in web development since 2022, further enhancing my expertise in creating engaging and responsive websites. My experience has equipped me with the ability to tackle challenges, meet deadlines, and deliver high-quality results. I am excited to continue my growth in web development and contribute my skills to future projects and opportunities.
